

## KORU Packing Specifications

Grade Standard	US Extra Fancy — *Unless otherwise noted below for specific standards.
Brix	12.0+ minimum average (typical 14+)
Pressure	14.0 lb. minimum average (typical 16+)
* Bruise	1/8" depth, 3/8" diameter
* Color	50% of the surface with good red color (see comments and picture guidelines). Compensating color is not allowed for grading.

## Color Guidelines

Comments: KORU typically grows to various shades of red. The lighter shades of reds range from a pinkish to orangish hue. The lighter shades are acceptable if the apples present themselves as solid and attractive. If the lighter shades are distinctly, orange, pink or brown and unattractive they are not acceptable. Background color should be light green to yellow. Hard green background is not acceptable.
