

'MN55' Variety Specification for Rave® brand apples

2020

Maturity

Starch: >4 minimum average (1 -6 scale)

Pressure: > 14lb minimum average

Soluble solids > 12.5° minimum average

Titrateable acidity: < 0.6% maximum average

Minimum sampling size 20 apples

Color

Blush: > 50% per fruit total surface area

Size Profile

Minimum size: Ct 163

Maximum size: Ct 36

Defects

Natural wax is a major issue for Mn55. Fruit MUST be harvested in a condition to avoid tacky/greasy texture and treated with 1-MCP well within 24 hours of harvest.
